

Sudoku 16x16 Vol III: Volume III

Revised - December 2015 - with all new puzzles. Collection of 300 computer generated Sudoku puzzles of the worlds most popular number game. All puzzles in this book are generated using our own invented algorithm that can generate puzzles of any dimension, even 81x81. The number of possible boards is only theoretically estimated so far. Our algorithm can generate all these boards practically. As all puzzles are randomly computer-generated, volume III contains puzzles different than volume II. The revised edition contains an altogether different set of puzzles. This Volume also contains solutions printed in the book itself.
