

Puzzles (Curious About)

In this little ebook, we will have a look at a few different sorts of puzzles, with many original ones (first published on the New Curiosity Shop website) interspersed with the odd quiz questions (to keep your memory muscle toned), lateral thinking puzzles and wordy interludes and few of the better known puzzles and riddles from history with a little background to their origins. My favourite puzzles are those where the simplicity of the question belies the complexity of the answer (such as the Whispered Numbers) or where there appears to be insufficient information (such as Whats the Date? or Mr Bramleys Apple). I hope you enjoy these assorted brain teasers. Paul Holmes, Author of Curious About Puzzles
